

Amendments to the Specification

Please replace the first paragraph on page 22, lines 1-7 with the following paragraph:

Referring to Fig. 11-15 other aspects of the door latch module 32 will now be described. The door latch module 32 includes a cam plate 150 that is driven by a cam 154. The cam 154 is, in turn, driven by the motor 64. The cam plate 150 is linearly movable on the plate 66 in accordance with the position of the cam within a cam opening 152 in the cam plate ~~154~~ 150. As the motor 64 rotates, the cam 154 is likewise rotated. Rotation of the cam 154 linearly translates the cam plate 150 in a reciprocal movement.
